RE: Requests for Information (RFI) Response #1

February 9, 2022

REQUEST FOR QUALIFICATIONS Professional Engineering, Consulting, and Planning Services for the Glenn County Airports

Questions and requests received are in black, County response is in red.

1. Please confirm if the same method of payment (T&E plus fixed fee) will be used for all types of contracts (design, construction administration, studies etc.)?

All types of contracts (design, construction administration, studies ect.) will be paid for as specified in the MEHTOD OF PAYMENT section of the RFQ.

2. Consultant selection is per FAA based on qualifications. Should the billing rate schedule be included in the SOQ or submitted during negotiations for each task order issued? If rate schedule has to be submitted at the time of the SOQ, will the consultant be held to it for the entire duration of the selection or can it, for example, be updated annually?

See Addendum 1.

3. Would the County consider modifications to the standard contract indemnification language? If so, would the following specific changes be acceptable?

Per STATEMENT OF QUALIFICATIONS REQUIREMENTS, 1. Introductory Letter,
“The letter should also indicate any conflicts or non-acceptability of the terms and conditions of the contract agreement attached to this RFQ. Proposed deviations and modifications to the contract agreement should be clearly noted and supporting reasons provided. Changes to the agreement will not be considered by the County of Glenn once Consultant selection has been completed.”
